Student Comments:

- Most definitely. This course was designed to be a research project of your own desire. Then there was data analysis involved which took a lot of critical thinking, especially when it came to understanding the data and writing about it!

Student Comments:

- Nothing has changed since the syllabus was released. I also like how each assignment is a building block for your main essay at the very end! Although some material can be very hard, my TA reexplained content well and was so helpful! Made us understand what was going on if we didn't understand.

- There were some strange in class activities that I don't think really benefited the students (the one or two worksheets when we partnered up). Other than that the course was really organized with lecture on M and W and F lab section reinforcing what we learned in class in a smaller class size environment.

Student Comments:

- Nic is phenomenal. I had him as a TA last year for 200 and I did not do his evaluation justice. This man is the best. He cares so much about us and wants to see us succeed both in the class and in life. He will help you in lab and will answer your emails pretty darn quick. He never makes you feel dumb or anything. He is so encouraging and understands how things can be confusing. Nic is a great teacher and person and I am very thankful to have had him for two semesters.
- Nick was a great TA, quite frankly the best TA i've had in any classes. He always made sure that the material was understood and always had useful answers to questions that helped me solidify my understanding or change a part of my assignment so it was done correctly.

Student Comments:

- Like I said, Nic is fantastic. I think everyone knows it and appreciates him and how he will go over something with you multiple times in different ways until you understand it.
- Very helpful with increasing understanding of material and clarifying confusion

- Nick broke down complex things we learned in lecture and made sure we understood what it meant and how to apply it in R.
